Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. The amendment filed 08/13/2003 has been entered.
2. Claims 14-28 are pending with claims 1-13 having been canceled.
3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 14-28 are rejected under 35 U.S.C. 102(b) as being anticipated by Gregg (US4722516) or FR2093448 to Dunlop or German 2064751 to Boger et al, all of record.

The outer guide 40 of Figure 1 of Gregg (US4722516), outer guide 19 of Figures 1-3 of or FR2093448 to Dunlop and outer guides 12 of Figures 1-2 or German 2064751 to Boger et al correspond to the outer guide 11 of the instant invention. No structural distinction exists between the instant claims and prior art.

5. Applicant's arguments filed 08/13/2003 have been fully considered but they are not persuasive. The examiner is unclear what applicants mean by the applied references are limited to external guides and not a contoured pneumatic suspension bellows when each one of the reference clearly shows bellows. Gregg (US4722516) has a bellows 18 while FR2093448 to Dunlop disclose a bellows 7 and the German reference 2064751 to Boger et al discloses a bellows 1. The term "contoured" as used in the specification does not preclude readability on the applied prior art.
